# HYDROGRAPHY

# Data available

Data provider	Level	Dataset	Scale
VUGK	National	UNIBA-SK50	1:50 000
ICC	Regional	BT-5M	1:5 000
		BT-50M	1:50 000
RLIG	Regional	DBPrior10K	1:10 000
RPIE/CSI	Regional	DBPrior10K	1:10 000
CGE	Local	CTC1000/CTC2000	1:1 000/1:2 000
IGP	National	ERMPT	1:250 000
		EGMPT	1:1 000 000
INSIEL	Regional	Dbprior_0203_Corso_acqua	1:10 000
RVEN	Regional	DBPrior10K	1:10 000
MAV	Local	GD010IDROLAGL1	1:5 000

# Data available

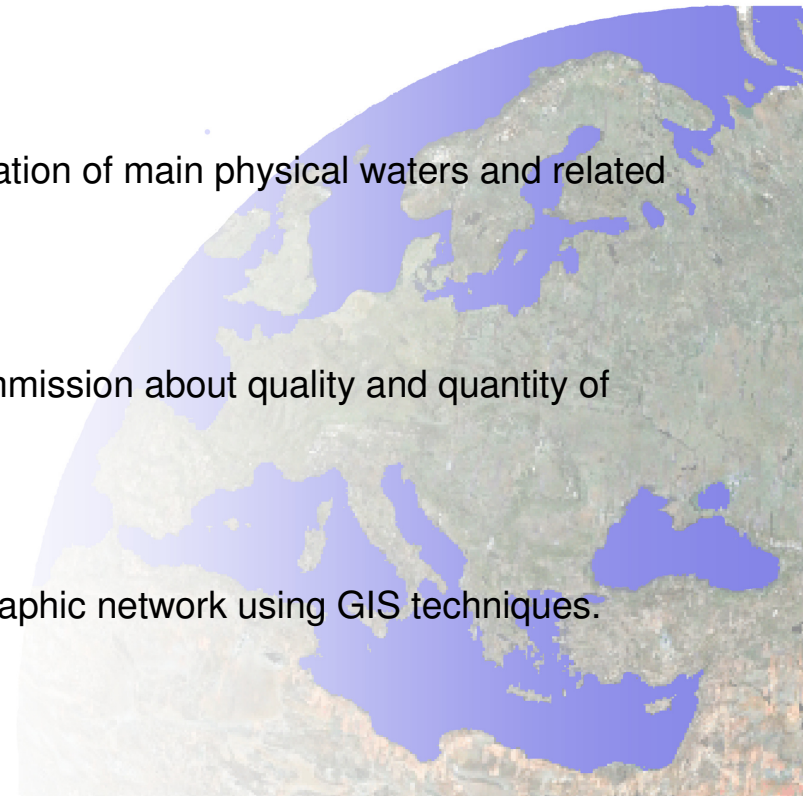

- 11 datasets from 9 data providers:
  - Local data at large scales
    - (1/1000, 1/2000 and 1/5000) (CGE & MAV)
  - Data using the DBPrior10k specifications
    - provided by regional data providers: (RLIG,RPIE/CSI,RVEN,INSIEL)
  - Data used for reporting in the context of the WFD
    - (VUGK – 1/50k)
  - Generic mapping data
    - from ICC (5k & 50k) and IGP (1/250k & 1/1M)

# INSPIRE DM

- Following the methodology defined in DS-D2.6 INSPIRE DM built around 3 use cases:
  - Mapping:
    - basic map reference; it includes the representation of main physical waters and related objects.
  - Reporting:
    - in the context of the WFD reporting to the Commission about quality and quantity of water.
  - Spatial Analysis and Modelling:
    - derivation of information based on the hydrographic network using GIS techniques.

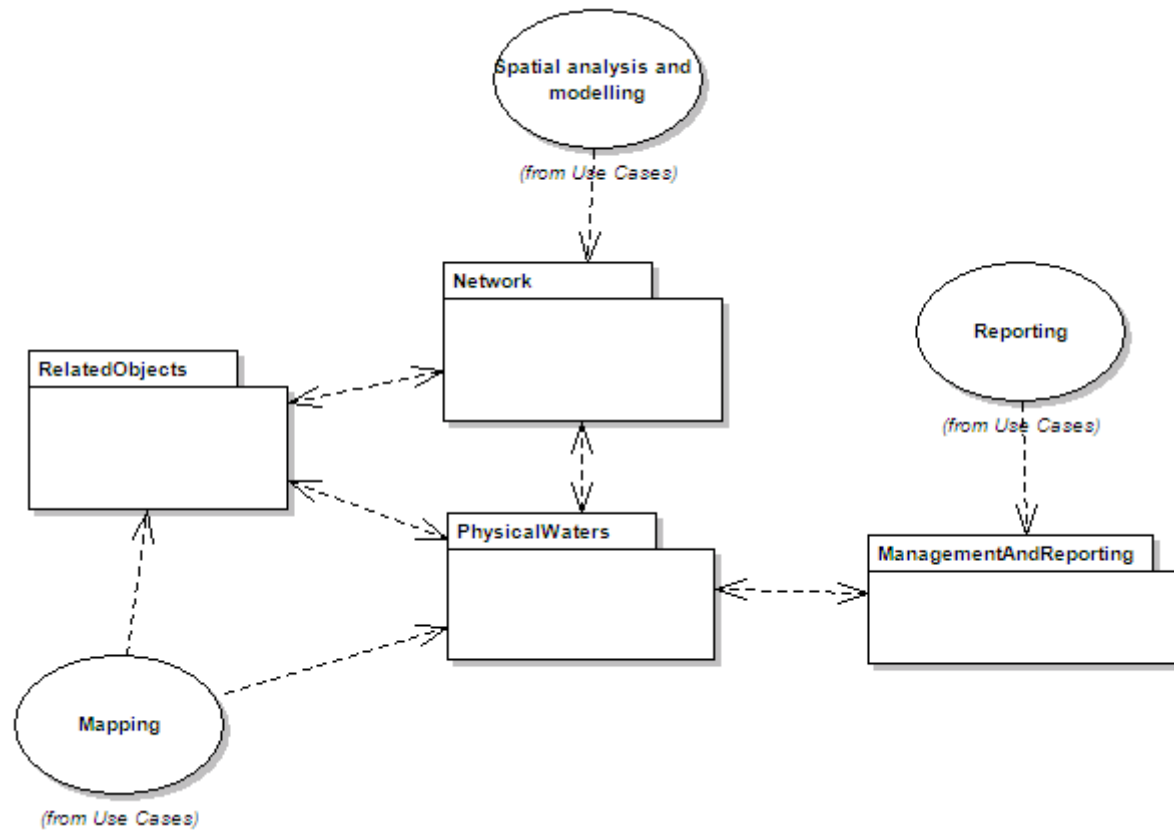

# INSPIRE DM

- 4 packages:
  - ManagementAndReporting:
    - base feature type is WFDWaterBody,
  - Network:
    - nodes, links, aggregated links (to define routes) and areas.
  - PhysicalWaters:
    - 11 feature types (CatchmentArea, Basin, SurfaceWater, Watercourse, StandingWater, LandWaterBoundary, Sea, Foreshore, Riverbank, Wetland and GlacierSnowfield).
  - RelatedObjects:
    - 24 other features (some are placeholders for Annex III themes, e.g. MonitoringPoint).
    - 3 sub-packages: HydroFacility, HydroPointOfInterest and ManMadeObject.

# INSPIRE DM

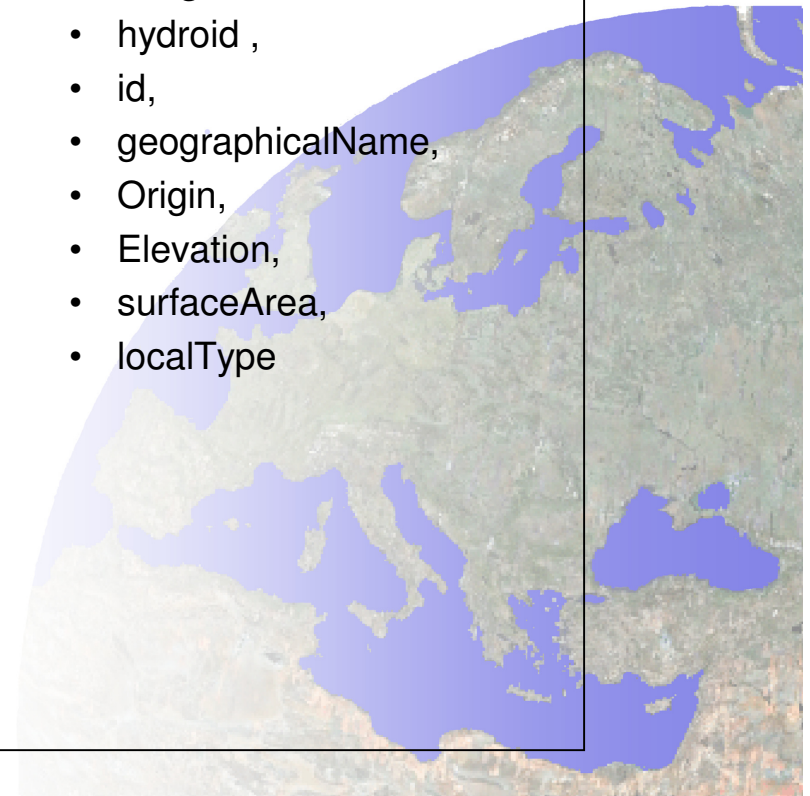

Package	INSPIRE features matched	NOT matched
Network	WatercourseLink, WatercourseNode (2)	4
ManagementAnd Reporting	WFDSurfaceWaterBody (1)	5
PhysicalWaters	StandingWater, Watercourse, LandWaterBoundary, Sea, Foreshore, Wetland, Riverbank, CatchmentArea (8)	3
RelatedObjects	DamOrWeir, Embankment, ShorelineConstruction, DischargePoint, SpringOrSeep, Pipe, Ford, AbstractPoint, VanishingPoint, SubsurfaceCrossing, SurfaceCrossing (11)	13

- Network package:
  - WatercourseLink
    - id,
    - geographicalName,
    - flowDirection ,
    - centerlineGeometry,
    - Length
  - WatercourseNode
    - id,
    - hydroNodeCategory

- PhysicalWaters package:
  - StandingWater
    - hydroid ,
    - id,
    - geographicalName,
    - Origin,
    - Elevation,
    - surfaceArea,
    - localType

- PhysicalWaters package:

- Watercourse

- beginLifespanVersion,
- endLifespanVersion,
- Origin,
- Condition,
- Fictitious,
- Level,
- id,
- geographicalName,
- length,
- LevelOfDetail ,
- localType,
- waterCourseHierarchy,
- persistence

- PhysicalWaters package:

- LandWaterBoundary

- Origin,
- waterLevelCategory,
- id

- CatchmentArea

- area,
- hydroid,
- geographicalName

- Foreshore

- geographicalName

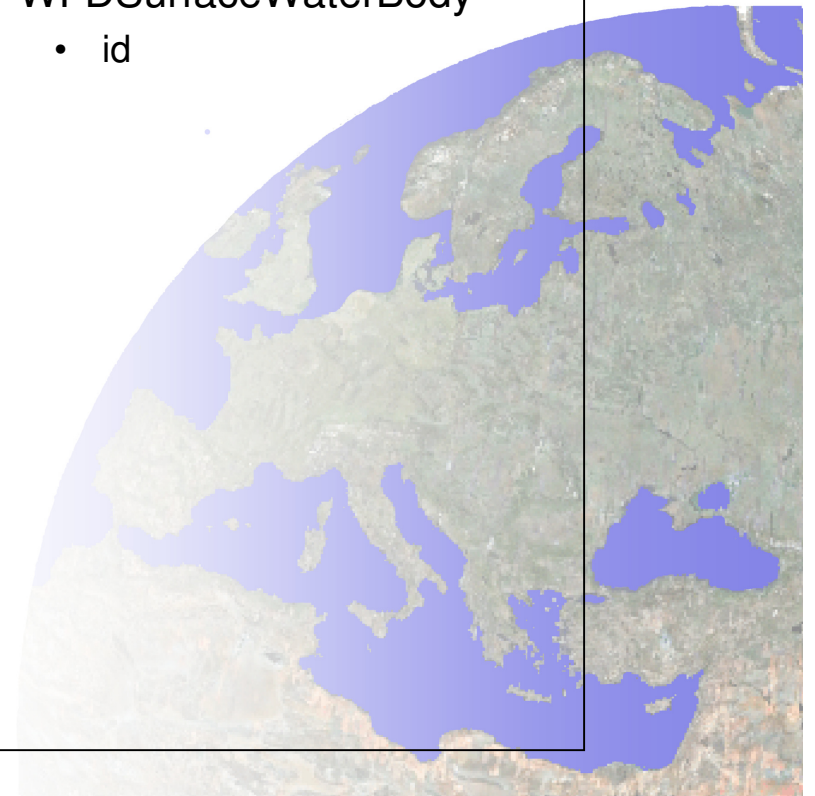

- Sea

- Wetland

- RelatedObjects:
  - DamOrWeir
    - condition
  - SpringOrSeep
  - Embankment
  - ShorelineConstruction
  - AbstractPoint
  - DischargePoint
  - Pipe
  - Ford
  - SubsurfaceCrossing
  - SurfaceCrossing
  - VanishingPoint

- ManagementAndReporting:
  - WFDSurfaceWaterBody
    - id

# Conclusions

- It was possible to find matchings for all features but one in two datasets
- It was possible to find matchings for most of the features for another two datasets
- Other datasets have more limited number of matchings
  - RLIG, RPIE, RVEN: each with 5 features matched
  - DBPrior10K, CGE, MAV, VUGK: no features from RelatedObjects package
- Some packages have almost no matchings:
  - ManagementAndReporting package: 1 match
  - Network package: 2 matches

# Conclusions

- Most of the matchings are with the features of the packages derived from the Mapping use case (PhysicalWaters & RelatedObjects).
- Some data providers reported the need for specific features types (e.g. MAV=speed limit).
- No GIS4EU dataset has full INSPIRE feature catalogue.
- Which features are mandatory to be considered INSPIRE compliant?
